1. Disconnect the battery ground cable.

Remove the electronic hydraulic control unit bolts.
Disconnect the anti-lock brake control module electrical connectors

4. Remove the anti-lock brake control module.

1. Remove the bolts.
2. Remove the control module.

INSTALLATION
1. To install, reverse the removal procedure. NOTE: When the battery is disconnected and reconnected, some abnormal drive symptoms may occur while the vehicle relearns its adaptive strategy. The vehicle may need to be driven 16 km (10 mi) or more to relearn the strategy.
